

FreeStep SAS - Supported Ambulation System

What is the FreeStep System?

Biodex FreeStep is an overhead track and harness system that provides a safe ambulation environment for the patient. FreeStep minimizes fear of falling that inhibits patients and allows therapists to safely facilitate improvement on gait mechanics and alignment.

What are the benefits of the FreeStep System?

- **Provides Support during therapy**
- **Improved gait/ambulation**
- **Sit-to-stand**
- **Ground & Treadmill Walking**
- **Ascending/Descending Stairs**
- **Balance training**
- **Fall prevention**

People with the following can benefit from FreeStep:

- **Spinal Cord Injuries**
- **Muscular Dystrophy**
- **Traumatic Brain Injuries**
- **Cerebral palsy**
- **Developmental Delay**
- **Ataxia**
- **Down Syndrome**
- **Genetic Disorders**
- **Orthopedic Injuries**
