

Handwriting Programs

Handwriting is more than words on paper. Handwriting is a complex process of managing written communication. Our Occupational Therapists can evaluate and identify the underlying causes of handwriting difficulties and provide treatment options.

Handwriting Therapy at Pediatrics Unlimited will address printing, cursive, drawing, and coloring through structured protocols, workbooks and work sheets.

Technology such as ipads and computers are incorporated into the therapy sessions when appropriate.

The Handwriting Without Tears Program is one of several programs available. The Handwriting Without Tears Protocol uses a multisensory approach to develop basic printing skills which will focus on letter formation, pencil control and fine motor skills.

Our Therapists are able to provide parent education and resources for parents to support handwriting at home.

For more information, contact us at (864) 595-4225 or (864) 627-0009.
