

Myofascial Release

Myofascial Release (MFR) is a gentle hands on technique that releases the fascia. Fascia is a 3-D connective tissue that runs head to toe without interruption. It surrounds ALL parts of our body, muscle, bone, nerves, organs, blood vessels down to the cellular level. Myofascial Release helps treat immobility in muscle and pain by relaxing muscles.

What does Myofascial Release help treat:

- **Spasms/spasticity**
- **Restricted range of motion**
- **Neurological dysfunction**
- **Back pain**
- **Cervical pain**
- **Chronic pain**
- **Head trauma**
- **Fibromyalgia**
- **Headaches**
- **CP**
- **CVA**
